

Graduate Student and Postdoctoral Fellow Positions

Our project that consists of basic sciences, scientific computing, smart polymers synthesis and characterization, flexible sensor and soft robot and machine learning development tasks is in need of graduate students and postdoctoral fellows who will be funded for three years through TUBITAK at the Turkish-German University located in Istanbul. We are looking for:

- Graduate students and postdoctoral fellows with knowledge in python programming, chemistry, physics, and biology for algorithm development.
- Graduate students and postdoctoral fellows with knowledge in smart polymer synthesis and characterization, polymer functionalization.
- Graduate students and postdoctoral fellows with knowledge in sensor development from electronics engineering areas.
- Graduate students and postdoctoral fellows with knowledge in machine learning algorithm development.

Interested students and fellows should their CV to weber@tau.edu.tr
