

German Speaking New Graduate Applications

About the job

“We Transform the Future into the Present”

We understand the business of our clients and know what it takes to transform it into the future. At NTT DATA Business Solutions, we drive innovation - from advisory and implementation to managed services and beyond; we continuously improve innovative solutions and technology to make them work for companies – and their people.

We leverage our strong partnership with SAP, AWS, and Microsoft to constantly build on our expertise and have a driving influence on future technologies and innovations. And as we are part of the NTT DATA Network, you can benefit from our global delivery capabilities and extensive network of technology experts and consultants.

With operations in more than 30 countries, we have enabled thousands of companies become more efficient and effective during the last three decades. Our more than 12,000 experts around the world will also accompany you on your journey toward a truly intelligent enterprise – wherever you want to start!

Why choose us?

Global Delivery is one of the leading departments of NTT DATA Business Solutions that provides support and implements projects for multinational corporations as well as for upper-medium-sized companies all around the globe. Our team is formed by young and energetic individuals from various backgrounds and locations, making our department a friendly environment for all. We idolize “life-long learning” as one of our key mottos, so you can always find a team member to contact whenever you need guidance and support, making us a perfect environment for juniors. As we are a department working remotely, you will be free to choose where you want to see the next sunrise around Turkey.

What You Will Do

Our team of around 80 consultants concentrates on core processes for the high-tech, automotive, machine and plant construction, aerospace & defense industries. It carries out ambitious and successful projects for global corporations as well as for upper-medium-sized companies all around the globe.

We are looking for a junior consultant/developer who will become part of our projects and support projects, providing topnotch solutions to our customers in the SAP (FI, CO, SD, MM, PP, QM, PM, WM, EWM, TM, Integration, ABAP, GRC) and nonSAP (AWS, Java, .NET, Frontend, Full stack, Test, Salesforce) environment, which optimally supports our customers and their processes.

What You Bring

Apply if you are a 4th-year student graduating in June 2023 with a bachelor's degree in natural sciences, economics, or engineering and interested in a junior-level position in our Global Delivery team.

- Preferred subjects are industrial engineering, business informatics, mechanical engineering, informatics, business administration, etc.
- IT-technical and business know-how because you understand not only the technical side but also the depicted processes in the company.
- First industrial experience you have gained through training, internships, or working student activities.
- Customer orientation is your top priority. You can listen well and put yourself in the shoes of our customers.
- Fluent in written and spoken German and English to complete your profile.
